Orleans County Natural Resources Conservation District

Farm Team: _____

The mission of the Farm Team is to streamline agricultural assistance and improve farm viability, while increasing adoption of on-farm conservation practices. The Orleans County NRCD (“the District”) will convene your service providers (i.e. NRCS, UVM Extension, grazing specialists, business planners, seed/fertilizer consultants, bank representatives, veterinarians) for focused discussion with you about your farming and conservation goals.

These meetings will be scheduled at your convenience and may be held on-farm or virtually via video conference call. The District will work with you to set up the type of meeting and the agenda that will work best for you and your farm. Prior to each of these meetings, District staff may contact you to gather any documents, maps, or updates that may be helpful to share with members of your Farm Team.

Orleans County NRCD (“the District”) commits to convening at least two (2) Farm Team meetings for your farm annually. By signing this form, you authorize the District to contact and coordinate with your service providers. *This program is supported with grant funds from the Agency of Agriculture.

“I give permission for the Orleans County NRCD to coordinate my Farm Team and contacting my agriculture service providers.”
